SAFE VISITING PRACTICES

Hand Hygiene

All persons visiting, including the residents, must wash their hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer, before, during as appropriate, and after all visits.

Use of PPE – General Practices

All Visitors are required to wear a mask (medical) continuously and be instructed how to put on and take off that mask and any other PPE that may be required.

Use of PPE to Enable Safe Physical Touch

The risk of transmission of COVID-19 increases with close proximity. If a resident and their Visitor understands this and they wish to include physical touch in their visits, this may be done by the following additional guidance:

- Immediately stop close contact with resident and inform staff if they are or become symptomatic during the visit.
- Continuously wear a mask that covers the nose and mouth.
- Though a resident does not need to also wear a mask, they may choose to do so.
- Perform hand hygiene (hand washing and/or use of alcohol-based hand sanitizer) both before and after direct physical contact with the resident.

Residents on Isolation Precautions

- Residents who are suspect cases of COVID-19, who are on isolation precautions, will not be permitted to have any visitation.
- Residents who are on isolation precautions for other reasons (e.g. norovirus, or influenza) may have a Visitor visit, at Rocmaura Inc.’s discretion. Required PPE (based on precaution) must be worn by Visitor at all times.
